# e-ABS /

The e-ABS is an electronically-controlled pneumatic brake system for towed vehicles used to prevent the wheels from locking during the braking, keeping an optimal stability on the vehicle and reducing the braking distance.

The e-ABS is an ABS brake system for commercial trailers and semitrailers. The system comprises a wide range of vehicles with configurations from 2Sensor/2Modulator up to 4Sensor/2Modulator.

Due to the experience of the electronic department of Cojali, the e-ABS offers an extremely robust and compact design. The e-ABS control algorithm has been optimized to offer safe braking in all conditions. In addition, two configurable digital outputs and two configurable analogue inputs provide unique characteristics and versatility to this electronic braking system.

Together with Jaltest diagnosis tool, the e-ABS system performs electronic diagnosis and other powerful interactions like component actuation or data communication. All this is implemented using CAN bus.
